CHAMFER BLADES

Cham-fer (cham'fer)

(Verb) 1. To make a bevel on.

(Noun) 2. Beveled edge or corner.

You can cut perfect chamfers in windows, doorways or on plain concrete edges with K2's Wall Saw Chamfer Blades.

Designed to cut on their own or in tandem with a standard wall saw blade.

CHAMFER BLADES

K2's chamfer blades are designed to fit right on your wall saw blade shaft. Just let us know the shaft size and leave the rest to us.

K2's chamfer blades:

- ◆ **8" & 10" Diameter**
- ◆ **1.500" (1-1/2" Chamfer)**
- ◆ **Can be utilized as a single bevel blade or mounted with a wall saw blade to cut the wall and the chamfer simultaneously.**

Great for door and window openings!

Call us and we can spec your job!
