

K2 DIAMOND

What's Newz

We introduced the BYM style blade back in 2003 and it's proven to be a fast cutting, general purpose hand saw blade at a great price.

Now we're introducing the "New" BYFM grade, which is even lower priced and is proving to be an overall great value!

BYM & BYFM grade blades

have a VERY TALL segment and a price tag that will “blow your mind”.

They're designed to combine speed and life with a great price for general purpose, cured concrete, wet or dry cutting jobs.
