The Incredible new...

diamond

Core Bits

**3 Designs, proven to be
defiant, resilient and unyielding!**

**Diamond core bits engineered and manufactured for
MAXIMUM PERFORMANCE**

**in the toughest drilling applications, including
pre-stressed concrete.**

K2 DIAMOND

WHAT'S NEW'Z

K2's new diaMAX core bits are engineered to be resilient in tough applications, defiant when the drilling gets treacherous and unyielding when the conditions would destroy normal bits.

The MAX 1

The Max 1 is designed to resist segment loss when cutting in tough conditions and pre-stressed concrete.

The MAX 2

The MAX 2 core bit utilizes an extremely effective design for unyielding performance in very tough conditions and cutting all pre stressed concrete applications.

The MAX 3

The MAX 3 is an aggressive core bit, utilizing a butted design that is resilient in extremely tough drilling conditions and resists the backlash of cutting pre-stressed concrete cable.
